

# Lesson 1: Thinking about How Things Change

## LESSON 1

Record Sheet 1-A

Name:

Date:

Feb. 19, 2004

### Looking at Changes in a Solid and Liquid

1. Write three words to describe the solid.

round smooth white

2. Write three words to describe the liquid.

wet clear bubbly

3. Put the solid into the liquid.  
Draw what you see.

Encourage students to make drawings that include details, such as bubbling.

4. What changed?

The solid dissolved.

Encourage students to write their own ideas about the changes they observed. Help them focus on changes to the water (it becomes bubbly, cloudy, and returns to being clear) and the tablet (it gets smaller and eventually disappears).
