

Animal Skeletons Assessment Rubric

Name _____

Level	Questions 1-3	Question 4
4	Makes reasonable inferences for all questions. Cites evidence from the drawing <u>and</u> past experiences to support inferences.	Discusses, in detail, the structure of the ribcage (shape of the ribcage and the number of bones) and is able to relate the structure of the ribcage to its functions (protection, support and movement). Relates the structure of the ribcage to that of animals studied previously.
3	Makes some reasonable inferences and supports the inferences with some evidence from the drawing.	Discusses, in detail, the structure of the ribcage (shape of the ribcage and the number of bones) and is able to relate the structure of the ribcage to its functions.
2	Makes few inferences and/or faulty inferences. Has difficulty supporting inferences with examples from the drawing.	Discusses part of the structure of the ribcage but is unable to tie the structure to its functions.
1	Answer is incomplete or unrelated to the drawing.	Answer is incomplete or unrelated to the drawing.
