

Major Bone Groups Assessment

Name _____

Level	Description of Bone Group (Question 2)	Function of Bone Group (Question 3)	Evidence to Support Ideas (Question3)
4	Uses many descriptive words or phrases to clearly and thoroughly describe the bone group, shape and special features.	Function of the bone is correct and related to the description given.	Evidence used to support the function of the bone group are clearly and thoroughly stated and related to the structure of the bone group.
3	Uses descriptive words or phrases to describe most of the special features and shape of the bone group.	Function of the bone group is incorrect but ideas expressed are related to the description of the bone group.	Evidence used to support the function of the bone group is stated clearly but not related to the structure of the bone group.
2	Uses some descriptive words or phrases to describe the bone group, but the description is unclear and/or incomplete.	Function of the bone group is not correct and unrelated to the description given.	Evidence used to support the function of the bone group is unclear but some relationship to the function is expressed.
1	The description of the shape and special features of the bone group is incomplete and may contain inaccurate information.	Makes little attempt to describe the function of the bone group.	Little evidence is given with no relationship to the description.
