## End-of-Unit Assessment

How do the skeletal and muscular systems work together?

*Helpful suggestion for writing a complete answer: Think back to the chicken wing lab, books we've read, and/or the video(s) we viewed on how parts of the body work together. Using the chicken wing or a part of your body, do the following:*

- ☐ *name the main parts (feel free to make a labeled sketch)*
- ☐ *describe the purpose of each part*
- ☐ *explain how the parts work together and what happens when the parts work together*
