

## Bones and Skeletons End-of-Unit Assessment

Student Name: \_\_\_\_\_

Level	Parts of the System	Purpose of the Parts	Systems Working Together
4	Correctly and completely names the main parts of the skeletal and muscular systems: <ul style="list-style-type: none"> <li>• bones</li> <li>• muscles</li> <li>• joints</li> <li>• tendons</li> <li>• ligaments</li> </ul>	Correctly and completely describes the purpose of each part of the skeletal and muscular systems: <ul style="list-style-type: none"> <li>• Bones provide structure or shape and allow movement with the help of muscles (also protect and produce blood cells)</li> <li>• Muscles are used to move parts of the body</li> <li>• Joints are the points where bones meet</li> <li>• Tendons connect muscles to bone</li> <li>• Ligaments connect or link bones together</li> </ul>	Understands how the muscular and skeletal systems work together <ul style="list-style-type: none"> <li>• muscles move bones</li> <li>• structures connect the systems or parts within a system (joints, tendons, and ligaments)</li> </ul>
3	Correctly names most parts of the skeletal and muscular systems.	Correctly describes the purpose of most parts of the skeletal and muscular systems.	Understands that the skeletal and muscular systems work together but is unable to fully discuss the specialized structures and how they connect the two systems.
2	Names some parts of the skeletal and muscular systems.	Describes the purpose of some parts of the muscular and skeletal systems.	Unable to discuss how the skeletal and muscular systems work together.
1	Answer is incomplete or unrelated to the question.	Answer is incomplete or unrelated to the question.	Answer is incomplete or unrelated to the question.
