

Name:

Science Essential Questions:

Below are the essential questions that we have been concentrating on in science. If you can answer them in writing, you will be well prepared for the end of the unit assessment. You can use your science binder or the Internet to help you. You are welcome to use diagrams to support your answers.

1. What does the digestive system do? What organs and processes are used in digestion?
2. How is food turned into substances that can be used by the cell?
3. What does the respiratory system do? How does it work?

4 What does the circulatory system do? How does it work?

5 What is the smallest structure that carries on the functions?

6. How do cells throughout the body get oxygen needed for life?

7. How do cells throughout the body get nutrients needed for life?
